

Yellow Fever

The Yellow Fever vaccination is both compulsory and essential for many South

American and African countries.

We are a World Health Organisation (WHO) approved Yellow Fever Vaccination Centre so we can both give the vaccine and provide the necessary International Certificate which is valid for 10 years.

**Ideally, treatment should commence
at least 3 months before travel**

Due to increases in the cost of the vaccine and the rise in the rate of VAT, the cost of a yellow fever vaccination will rise to £57.50 with effect from 1 July 2011.
